

CurrentCare DataGuide

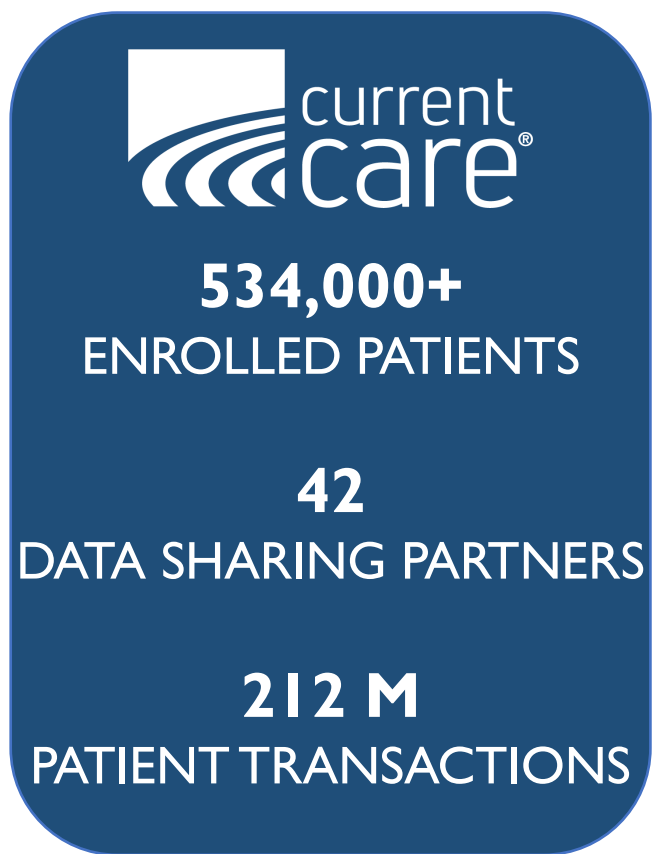

A guide to information available in CurrentCare

What is CurrentCare?

CurrentCare is Rhode Island's Health Information Exchange (HIE). It's a secure network that collects information from practices, hospitals, labs, imaging centers, and other data sources to share crucial patient information. When patients enroll in CurrentCare, their providers can access their medical information to provide the right care at the right time.

CurrentCare for Me lets enrollees access their own health record online, 24/7, from anywhere.

CurrentCare receives clinical information from 11 Electronic Health Record (EHR) systems:

athenahealth	ImageTrend
Cerner	MatrixCare
eClinicalWorks	MEDITECH
eHealth Exchange	NextGen
Epic	PointClickCare
GE	

Clinical Data Available

Documents

Clinical Documents

Continuity of Care Documents (CCDs) summarize clinical data from an organization. May include problems, meds, allergies, vitals, procedures, history, progress notes or other practice-specific information. Document title is 'Medical Record Summary.'

Discharge Documents (Hospitals)

Discharge CoCs (Continuity of Care Documents). Each hospital or ED visit can be viewed as a separate document, including prescribed meds, discharged-to location, patient instructions & more! Downloads to your computer in Word or WordPad.

Discharge Summaries are available only after sign off by a treating provider. May include a reason for hospitalization, discharge condition, and patient & family instructions. Frequently will contain Hospital Course/Progress notes.

EMS Documents (Ambulance Visits)

Each ambulance visit is summarized in a 'Run Report' including a Narrative, assessments, meds administered, and the Discharge Location.

ADT (Admission, Discharge, Transfer) Data

Ever wonder where your patients are? When a patient has been admitted or discharged, you can view **Encounter Data** from facilities that share ADT information with CurrentCare.

Clinical Data

You will find clinical data on the following tabs: **Medications, Conditions, Allergies, Vital Signs**, and you can see a list of encounters on the **Encounters** tab.

Test Results

You will find results on the following tabs: **Lab Results, Diagnostic Imaging, EKG Imaging**, the patient's **Summary Report** and within some **Documents**.

Part 2 Data

42 CFR Part 2 ('**Part 2**') is a federal regulation protecting the confidentiality of Substance Use Disorder (SUD) Patient Records. CurrentCare does not currently display any Part 2 Data.

Medication Data

- CurrentCare displays medication data as reported from participating **provider organizations & hospital systems** (shown within “CCDs” to the right and on pages 3–5)
- Available in 3 CurrentCare Viewer tabs:
 - Current Medications
 - Historic Medications
 - Clinical Summary → Medications
- Learn more at RIQI.org/Meds
- As of March 2024, medication data from Pharmacies and Pharmacy Benefit Managers are no longer available in CurrentCare.

IMAGING RESULTS (Independent Facilities)

- Advanced Radiology
- Coastal Imaging (now within Lifespan)
- Open MRI of New England
- Rhode Island Medical Imaging
 - including former ‘XRA Medical Imaging’ sites

LAB TEST RESULTS (Independent Facilities)

- Dominion Diagnostics (COVID-19 only)
- East Side Clinical Labs
- Lifespan Laboratories (now includes Coastal Medical)
- Quest Diagnostics (limited to patients & ordering providers with RI addresses)
- RI Department of Health
