

# You need to know when your patients are in the hospital or ED. We can help.

Care Management Alerts and Dashboards notify you when **ALL** of your patients go to hospitals, EDs and skilled nursing facilities in Rhode Island (whether they are in CurrentCare or not). With Care Management Services, you can:

- Proactively contact patients to coordinate care
- Save time searching for information
- Reduce readmissions and ED visits

“ We feel that having information from Care Management Services is really the ultimate in care. ”

— RIPPCPC NURSE CARE MANAGERS

Let our clients show you the benefits:

Receive near real-time notifications when your patients are admitted and discharged.

See reverse for more info...

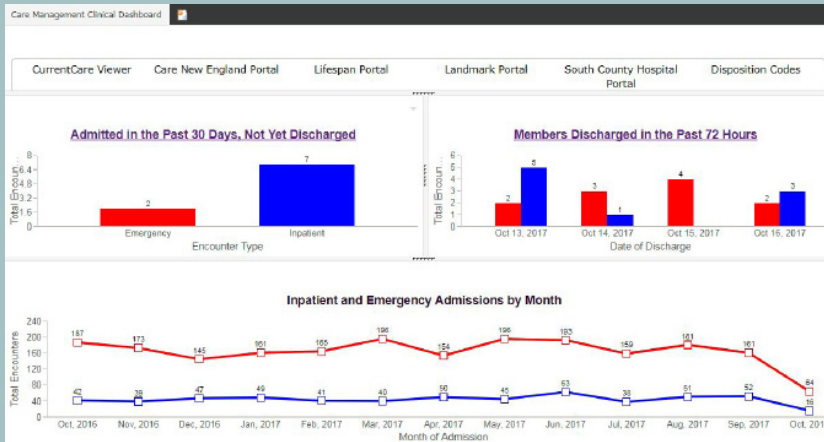

Use this information to coordinate care, provide timely interventions and follow-up.

# Care Management Dashboard:

The Care Management Dashboard provides near real-time patient information on which patients are currently in a care facility and those who have been recently discharged.

Dashboards include:

- hospital & room number
- reason for visit
- discharge location
- number of ED and inpatient encounters in the last six months
- Risk scores: Charlson Comorbidity & LACE

You can view data for patients you are treating and see trends in utilization for the previous year.

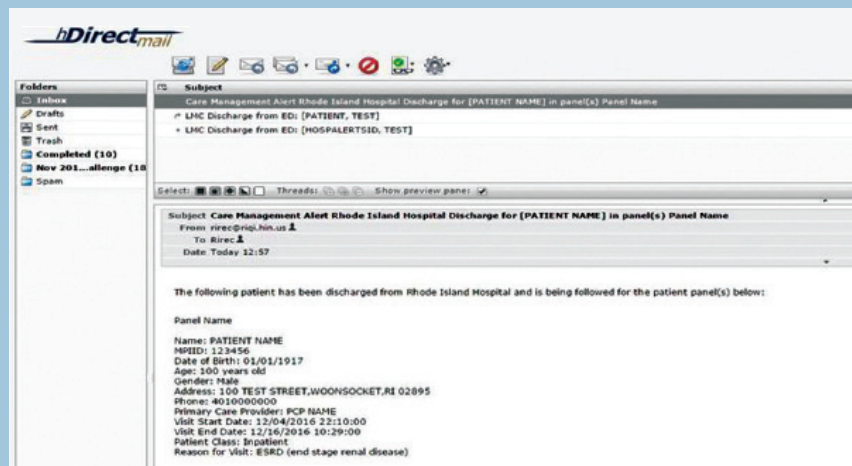

## Care Management Alerts:

Get near real-time alerts through Direct messaging when your patients are admitted, transferred and discharged from acute care hospitals, or participating skilled nursing facilities.

Alerts include key admission and discharge data, including:

- specific demographic information
- reason for the visit
- hospital
- time of encounter
- discharge CoC documents from Lifespan

Get alerts for patients you are treating, including those who are not enrolled in CurrentCare.
