

CurrentCare Guidebook

A guide to patient information available in CurrentCare
December 1, 2019

CurrentCareRI.org

BENEFITS

- + Improve patient care
- + Save staff time
- + Increase care coordination
- + Helps meet value-based programs

Inside...

What is CurrentCare?	2
Clinical Data	4
Primary Care	8
Specialists	9

What is CurrentCare?

CurrentCare is Rhode Island's statewide Health Information Exchange (HIE), designed and built through the cooperative effort of the RI healthcare community. This secure network collects information from practices, hospitals, labs, imaging centers, pharmacies and other data sources to share crucial patient information and avoid fragmented data. When patients opt in to CurrentCare, their provider(s) can access their available healthcare information to provide the right care at the right time. Through CurrentCare, duplicate testing can be avoided and clinical staff can quickly access critical information in real time to support safe and effective transitions of care.

 Individuals enrolled in CurrentCare can securely access their personal health record online 24/7 with CurrentCare for Me.

CurrentCareRI.org

Systems Sharing Data with CurrentCare

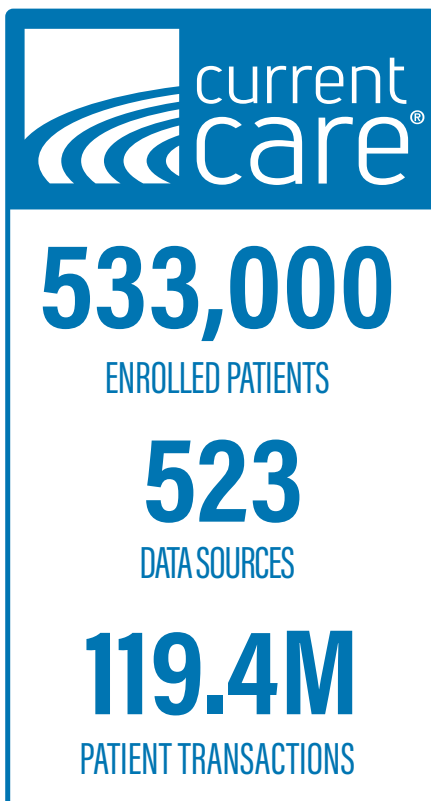

CurrentCare is able to receive clinical information from 12 Electronic Health Record or Health Information Exchange systems:

Allscripts	Greenway
Amazing Charts	ImageTrend
athenahealth	Intergy
Cerner	MEDITECH
eHealth Exchange	NextGen
Epic	PointClickCare

The following EHRs receive clinical summaries from CurrentCare directly into their patient records:

[athenahealth**](#)
[eHealth Exchange](#)
[Epic**](#)
[Intergy**](#)
[MEDITECH](#)
[NextGen](#)

**Able to add and reconcile medications, allergies and problems

Clinical Data Available

Encounter Documents

Clinical Documents

Continuity of Care Documents (CCDs) summarize the most recent encounter from an organization. May include problems, meds, allergies, vitals, procedures, history, progress notes or other practice-specific information. Titles include: Summary of Episode Note, Continuity of Care Document or Medical Record Summary.

Discharge Documents (Hospitals)

Discharge CoCs (Continuity of Care Documents). Each hospital or ED visit can be viewed as a separate document, including prescribed meds, discharged-to location, patient instructions & more! Downloads to your computer; viewable in Word or WordPad.

Discharge summaries are available only after sign off by a treating provider. May include a reason for hospitalization, discharge condition, and patient & family instructions. Frequently will contain Hospital Course/Progress notes.

EMS Documents (Ambulance Visits)

Each ambulance visit is summarized in a 'Run Report' including a Narrative, assessments, meds administered, and the Discharge Location (or "not transported").

ADT (Admission, Discharge, Transfer)

Ever wonder where your patients are? When a patient has been admitted or discharged, you can view **Encounter Data** from facilities that share ADT information with CurrentCare.

Encounter Data

You will find encounter-specific data on the following tabs: **Medications, Conditions, Allergies, Vital Signs**, and you can see a list of encounters on the **Encounters** tab.

Test Results

You will find results on the following tabs: **Lab Results, Diagnostic Imaging, EKG Imaging**. Also found in the patient's Summary Report and within some Documents.

Part 2 Data

Substance Use Disorder (42 CFR Part 2) — Medical & behavioral health information from substance and alcohol treatment centers for patients who have consented to share this info.

Other

Advance Directives and other end of life wishes can be found on the **Directives** tab. Patient surveys and assessments are found on the **Patient Surveys** tab.

“

I find CurrentCare really, really helpful and I use it often. I can generally get lab results the same day the patient has done the lab, and it saves me a lot of time.

– Julia Manning, Pharmacist
South County Hospital — Coumadin Clinic &
South County Family Medicine
