

COVID-19 Notes for CurrentCare for Me

As of 3/31/20, RIQI is receiving some COVID-19 lab results from the following labs:

- Lifespan Hospitals (RIH, Miriam, Newport)
- Care New England Hospitals (Kent, Women & Infants)
- CharterCARE Hospitals (Roger Williams, Fatima)
- Landmark Hospitals (Landmark, RHRI)
- South County Hospital
- Westerly Hospital
- East Side Clinical Labs
- Quest

Any results that are sent to RIQI are available in CurrentCare for Me after a 24 hour hold, to allow time for your provider to contact you. The names of the tests vary by testing organization, and include: *COVID19, Coronavirus, SARS-Cov-2*, and similar, but also less obvious titles such as *Micro Miscellaneous Test or Send Out Reference Test*.

You can find lab results under “Health Records” on the “My Lab Tests” tab.

IMPORTANT: The wording of these results can be very confusing. Look for words in the “Value” or something in the report itself. Ignore the text in “Normal Range,” which is just explaining that a normal result would show as “Not Detected”.

For example:

- “Positive” or “Detected” for a positive result (meaning that you have COVID-19)
- “Negative” or “Not Detected” for a negative result (meaning that you do not have COVID-19)

Here are examples of what you could see in CurrentCare for Me based on where the test was administered (*the following information includes fake names, DOBs and dates*):

The screenshot shows the CurrentCare for Me interface. At the top, there are logos for 'current care' and 'Rhode Island Quality Institute'. A navigation bar includes 'Home', 'Health Records', 'Download My Records', 'Messages', 'Library', 'My Account', 'Designee Alerts Inbox', and 'Logout'. A sidebar on the left lists categories like 'My Personal Information', 'My Lab Tests', 'My Medications', 'My Vitals', 'My Allergies', 'My Conditions', 'My Immunizations', and 'My Hospital Diagnoses'. The main content area displays a table with columns for 'Test', 'Value', 'Normal Range', 'Interpretation', and 'Chart'. The table contains two rows: 'Special Pathogen Source' with 'Nasopharyngeal' and 'Normal' interpretation, and 'Special Pathogen Result' with a detailed text description of the test and a 'Normal' interpretation. The text in the 'Value' column for the second row includes 'Accession: RI-20-017351
CDC 2019 Novel Coronavirus rRT-PCR: POSITIVE for SARS-CoV-2' and other technical details. A red box highlights the 'POSITIVE' result. At the bottom, it says 'Entered on March 19th, 2020 9:38 AM at CARENE.'
